## Leaded Bronze Hollow Rods

Coming from the bronze family  
Leaded Bronze Hollow Rods is a standard alloy  
finding usage in areas like:

- Hardware applications
- Electrical applications
- Fasteners
- Industrial applications

Some of the areas these are used in include as:

- Electrical connectors
- Screws and nuts
- Pickling crates
- Fixtures and racks
- These are also common in screw machine applications

Having excellent soldering capabilities, these have good capacity for being Cold worked and also have good brazing property. These have equivalent specifications of ASTM B140/ B140M (Copper Alloy UNS No. 31400) and reference specifications of Mil-V-18436.

### Specifications:

|                          |                                                                     |
